

Download Gm Ecotec Performance Guide

The GM Ecotec engine, also known by its codename L850, is a family of all-aluminium inline-four engines, displacing between 1.4 and 2.5 litres. While these engines were based on the GM Family II engine, the architecture was substantially re-engineered for the new Ecotec application produced since 2000. This engine family replaced the GM Family II engine, the GM 122 engine, the Saab H engine, and ...GM's versatile and technologically advanced Ecotec 2.4L LEA is the standard engine in a wide range of vehicles. Direct injection technology helps it deliver horsepower and torque. In our comprehensive General Motors engines guide, we've compiled information about all of GM's current engine offerings, including specs, pictures and more. The GM Generation I and Generation II (LT) engine families are both derived from the longstanding Chevrolet small block V8. The Generation III small-block V8 was a "clean sheet" design, which replaced the Gen I and Gen II engine families in 2003 and 1996 respectively. Like the previous two generations, the Buick and Oldsmobile small blocks, the gen III/IV can be found in many different brands.
