The Company J&S Machine Tool Repair, LLC was formed in January 2010 by Jerry Steele. With 28 years of knowledge and experience with repairing, servicing, installing and training in all forms of machine tools for the machining, fabrication and sign industries. The original Kurt Anglock® D-Series manual milling vise is designed for precision part clamping on basic machine tools such as knee-type mills and machining centers. Kurt Workholding's manual vises feature 1 or 2 moveable jaws and are offered in a wide range of configurations and with jaw widths up to 10" for precision machining. Manual milling vises can be used for horizontal or vertical machining and we offer various accessories to customize your manual vise. Contact us today. I have a Lagun variable mill the belt was missing when I got the mill after looking around the net I found H&W Machine Repair they had the belt. I paid for it got it in after putting the mill together it will not run with the motor and belt in place with the motor of the machine it does run. Has anyone had a problem like this before I have put belts on mills before but never had them do this ...
