

Download McGill Pain Questionnaire

The McGill Pain Questionnaire (MPQ) is a three-part pain assessment tool that measures several dimensions of the patient's pain experience (Fig. 222-4). The first part consists of an anatomic drawing of the human form on which the patient marks where his or her pain is located. The second part of the MPQ is a VDS that allows the patient to record the intensity level of his or her current pain ...The McGill Pain Questionnaire Overview: The McGill Pain Questionnaire can be used to evaluate a person experiencing significant pain. It can be used to monitor the pain over time and to determine the effectiveness of any intervention. It was developed at by Dr. Melzack at McGill University in Montreal Canada and hasThe McGill Pain Questionnaire, also known as McGill Pain Index, is a scale of rating pain developed at McGill University by Melzack and Torgerson in 1971. It is a self-report questionnaire that allows individuals to give their doctor a good description of the quality and intensity of pain that they are experiencing. The McGill Pain Questionnaire consists primarily of 3 major classes of word descriptors--sensory, affective and evaluative--that are used by patients to specify subjective pain experience. It also contains an intensity scale and other items to determine the properties of pain experience. The ...Appendix IV (i) SHORT FORM MCGILL PAIN QUESTIONNAIRE and PAIN DIAGRAM (Reproduced with permission of author © Dr. Ron Melzack, for publication and "Measures of adult pain: Visual Analog Scale for Pain (VAS Pain), Numeric Rating Scale for Pain (NRS Pain), McGill Pain Questionnaire (MPQ), Short-Form McGill Pain Questionnaire (SF-MPQ), Chronic Pain Grade Scale (CPGS), Short Form-36 Bodily Pain Scale (SF-36 BPS), and Measure of Intermittent and Constant Osteoarthritis Pain (ICOAP). "The McGill Pain Questionnaire (MPQ) [5] has become one of the most widely used tests for the measurement of pain. It provides valuable information on the sensory, affective and evaluative dimensions of pain experience and is capable of discriminating among different pain problems [7]. Objective. The McGill Pain Questionnaire (MPQ) is a self-reporting measure of pain used for patients with a number of diagnoses. It assesses both quality and intensity of subjective pain. Intended Population. Validated for patients with Cancer, Chronic Pelvic Pain, Fibromyalgia, Headaches, Herniated intervertebral discs, Ischemic muscular pain, Low back pain, Lumbago-sciatica, Orthodontics ...McGill-Melzack Pain Questionnaire, the McGill Pain Assessment Questionnaire and the McGill Pain Questionnaire, all of which differ, although all contain the pain descriptors reviewed here (5), Table 1). A short-form MPQ has been developed which includes 15 words (11 sensory, four affective) (25). Created Date: 2/6/2001 1:24:49 PM
